Gyakorlat #7_plusz.

- Mennyire bízhatunk meg a Microsoft-ban, mint "az ügyfelei után nem kémkedő" gyártóban és szolgáltatóban, akár desktop akár szerver operációs rendszer használóként?
 Röviden: Semennyire.
- 2. Mit tehetünk saját védelmünkben Windows 7 illetve Windows 8.1 esetén? Törülnünk kell a gépünkről néhány olyan windows frissítést, ami rólunk (a viselkedésünkről, szokásainkról, net használatunkról, stb.) készít statisztikát, és azt el is juttatja a Microsoft-hoz. A törlést legegyszerűbben egy adminisztrátori joggal elindított cmd ablakban végezhetjük el. (Az indítás módjáról a korábbi gyakorlatokon már volt szó...) Azért írtam, hogy törölni kell, mert ezek valószínűleg már a gépünkön vannak. A jövőre nézve pedig ügyelni kell arra, hogy a későbbieknek ne települhessenek fel.

- 3. Mit tehetünk saját védelmünkben Windows 10 esetén?

A probléma összetettebb, hiszen más a teendő telepítés közben (nyilván többen csak ez után állnak neki a telepítésnek, vagy újratelepítésnek), illetve más a már feltelepített rendszer esetében.

• Telepítés közben

A legfontosabb, hogy semmiképpen se használjuk az "Express Settings" opciót, illetve a "Customize Settings" alatt is gyakorlatilag mindent ki kell kapcsolni.

Customise settings			1
Browser and protection			
Use SmartScreen online services to help protect against malicious content and downloads in sites loaded by Windows browsers and Store apps. Off			
Use page prediction to improve reading, speed up browsing, and make your overall experience better in Windows browsers. Your browsing data will be sent to Microsoft.			
Connectivity and error reporting			
Automatically connect to suggested open hotspots. Not all networks are secure. Off			
Automatically connect to networks shared by your contacts. Off			
Send error and diagnostic information to Microsoft.			
Off			-

Customise settings		
Personalisation		
Personalise your speech, typing and inking input by sending contacts and calendar details, along with other associated input data to Microsoft. Off		
Send typing and inking data to Microsoft to improve the recognition and suggestion platform. Off		
Let apps use your advertising ID for experiences across apps. Off		
Location		
Let Windows and apps request your location, including location history, and send Microsoft and trusted partners some location data to improve location services. Off		
Ġ	<u>B</u> ack	Next

Célszerű csak helyi fiókot használni Windows 10 alatt. Ezt úgy tehetjük meg, hogy a "Make it yours" képernyő alatt a "Skip this step" opciót választjuk.

• Feltelepített rendszer esetében

Mindent le kell tiltanunk a "Settings" alatt található "Privacy" beállításaiban, hacsak nincs valamire feltétlenül szükségünk (én a teljes tiltást javaslom...).

MANAGE WI-FI SETTINGS

Wi-Fi Sense

Wi-Fi Sense connects you to suggested Wi-Fi hotspots and to Wi-Fi networks that your contacts share with you. By using Wi-Fi Sense, you agree that it can use your location.

Remember, not all Wi-Fi networks are secure.

Learn more

Connect to suggested open hotspots

Connect to networks shared by my contacts

Give and get Internet access without seeing shared passwords. You'll get connected to Wi-Fi networks your contacts share, and they'll get connected to networks you share. Tiltsuk le a CORTANA hangfelismerőt, valamint a "Search bar" keresési opciót. A "Settings" alatt tudjuk ezt megtenni, legegyszerűbben a fogaskerék ikon megnyomásával.

A telemetriai adatok továbbításának letiltása szintén egy adminisztrátori joggal elindított cmd ablakban végezhetjük el legegyszerűbben.

- sc delete DiagTrack
- o sc delete dmwappushservice
- echo "" > C:\ProgramData\Microsoft\Diagnosis\ETLLogs\AutoLogger\ AutoLogger-Diagtrack-Listener.etl
- reg add
 "HKLM\SOFTWARE\Policies\Microsoft\Windows\DataCollection"/v
 AllowTelemetry /t REG_DWORD /d 0 /f

Következő lépés az EDGE böngésző beállítása. Megnyitás után a "More Actions" \rightarrow "Settings" \rightarrow "View Advanced Settings" alatt végezzük el a következő beállításokat.

Utolsó lépésként, amennyiben használni kívánjuk a "Microsoft Account"-ot, célszerű lokális fiókká konvertálnunk azt a "Settings" \rightarrow "Accounts" \rightarrow "Your Accounts" menüben a következő módon.

Már csak annyi dolgunk maradt, hogy a szinkronizálást is kikapcsoljuk a "Settings" \rightarrow "Accounts" \rightarrow " Sync your settings" menüben.

4. Ezek után "relatíve nagyobb bizalommal" használhatjuk a Microsoft operációs rendszereit, de ne felejtsük el, hogy a jövőbeli frissítések, javítások még okozhatnak némi meglepetést...
